

PIPERENEW®

Proprietary blended granular material, water soluble product with surfactants and encapsulated oxygen

- ▼ Aggressive on paraffinic and asphaltenic deposits in reduced flow pipelines
- ▼ Increases water activity to penetrate very hard plugs at temperatures as low as 34°F
- ▼ Will penetrate plugs over a mile in length
- ▼ Will leave a micro resistant film to help prevent accumulation of future deposits

PHYSICAL PROPERTIES

Appearance:	White granular material
Odor:	Very low odor
pH of 1% Solution:	11-12
Water Solubility:	120g/l @ 25°C
Bulk Density:	67.6 lbs./ft ³

TRANSPORT INFORMATION

U.S. Department of Transportation (Road or Rail):	Not Regulated
Canadian T.D.G:	Not Regulated
Water Transportation (IMDG):	Not Regulated
Air Transportation (IATA):	Not Regulated

PACKAGING

PipeRenew® is available in 45-pound pails.
